This project will be funded by State Dollars through BSU Revenue Bonds. The Division of Public Works (DPW) will administer the project according to the terms and conditions of the award, State laws and guidelines. The Design Professional will receive general instructions through the State. A Project Manager from DPW will be assigned to serve as project manager and liaison between the Department of Administration, the Agency, and the Design Professional.

DESCRIPTION OF PROJECT

To construct a new student residence hall that will house approx. 450 first-year students in August of 2025. The housing units will consist of a mixture of single and double occupancy rooms with central bathrooms. Support spaces will include units for resident advisors, the resident director, other resident staff, office functions as well as common spaces such as kitchens, study areas, lounges, etc. with the following specific requirements:

Each floor shall consider centrally located common spaces on each floor, such as lounge(s) and small kitchenette(s) that encourage gathering and interaction.

Each room will be outfitted with traditional residence hall furnishings of wardrobes, beds, and desks and have durable finishes such as LVT.

The building will accommodate Resident Advisors (RA's) in single-occupancy suites on each floor at a ratio of approximately 1:30-35 students.

The bathrooms will have common area lavatories, but private toilets and showers with a ratio of approximately 1:4 occupants.

The first-floor programming of the residence hall may incorporate a secure entry, administrative space (front desk, mail receiving and storage, large/centralized building kitchen, a study lounge/dedicated quiet space, and food service/convenience store).

The building will also have accommodations for one (1) Resident Director (RD) located on the first floor with exterior access. The RD suite will be a two-bedroom, one bathroom apartment.

This project should consider connections with the river/greenbelt, amphitheater, and indoor/outdoor gathering spaces. An upper-level terrace for use by residents could also be considered. It is anticipated that the project will be sited on campus between the existing Library and Hemingway Literary Center backing up to Ceasar Chavez Lane (see attached APPENDIX 'B'). It is anticipated that this site could accommodate a (7) story, 108,500 SF building with a footprint of 15,500 SF.

In addition to adhering to schedule and budget, the design shall consider the following: building life (30+ years), construction type (concrete podium with metal stud construction), noise transmission, energy efficiency, lifecycle costs, durable finishes, campus design standards, and sustainability certification.

REQUIRED SERVICES

The State is requesting proposals for complete design services including observation during construction. A total project budget of approximately \$43,500,000 has been established to include fees, reimbursables, contingencies, and tests. A relatively complete construction cost estimate will be required following the Schematic Design Phase and must be updated at each additional phase.

The Design Professional and consultants shall be licensed to practice in the State of Idaho for their specific disciplines.

The Design Professional will be responsible for programming, schematic design, design development, construction documents, approvals by the authorities having jurisdiction, bidding, construction administration, project closeout and LEED certification (silver or better)

The Design Professional will be required to upload all documents to DPW's cloud-based project management system, ProjectMates. Documents may include, but are not limited to meeting minutes, sketches, diagrams, programming analysis, photographs relevant to the project, drawings, project manual, schedules, cost estimates, etc.

The Design Professional will be required to meet monthly with the Project Manager for the purpose of providing a verbal and written report regarding the previous month's progress. Such monthly meetings will show funds expended in the completion of the project and specific accomplishments related to the completion of the project.

The Design Professional shall keep in mind that during all phases, code compliance, energy efficiency, and building maintenance concerns should be incorporated into the design.

The Design Professional shall develop all necessary presentation materials for, at minimum, one (1) presentation to the Permanent Building Fund Advisory Council.

ARTICLE 3 CONSTRUCTION COST

3.1 DEFINITION

3.1.1 The Construction Cost shall be the total cost or estimated cost to the OWNER of all elements of the Project designed or specified by the DESIGN PROFESSIONAL and incorporated into the construction contract.

3.1.2 Construction Cost does not include the compensation of the DESIGN PROFESSIONAL and the DESIGN PROFESSIONAL'S consultants, the cost of the land, rights-of-way, or other costs that are the responsibility of the OWNER as provided in ARTICLE 2.

3.2 CONSTRUCTION COST

3.2.1 Evaluations of the OWNER'S Project budget and estimates of Construction Cost, prepared by the DESIGN PROFESSIONAL, represent the DESIGN PROFESSIONAL'S best judgment as a design professional familiar with the construction industry. It is recognized that neither the DESIGN PROFESSIONAL nor the OWNER has control over the cost of labor, materials or equipment, over the Contractor's methods of determining bid prices, or over competitive bidding or market conditions. Accordingly, the DESIGN PROFESSIONAL cannot and does not warrant or represent that bids will not vary from the Project budget or from any estimate of Construction Cost or evaluation prepared by the DESIGN PROFESSIONAL.

3.2.2 Prior to the Bidding Phase the DESIGN PROFESSIONAL shall be permitted to include contingencies for design, bidding and price escalation, to determine what materials, equipment, component systems and types of construction are to be included in the Contract Documents, to make reasonable adjustments in the scope of the Project and to include in the Contract Documents alternate bids to adjust the Construction Cost to the fixed limit. Fixed limits shall be increased in the amount of any increase in the Contract Sum occurring after execution of the Contract for Construction.

3.2.3 If the Bidding Phase has not commenced within three (3) months after the DESIGN PROFESSIONAL submits the Construction Documents to the OWNER, any Project budget or fixed limit of Construction Cost shall be adjusted to reflect any change in the general level of prices in the construction industry between the date of submission of the Construction Documents to the OWNER and the date on which proposals are sought.

3.2.4 If a Project budget or fixed limit of Construction Cost (adjusted as provided in Subparagraph 3.2.3) is exceeded by the lowest bona fide bid, the OWNER shall (1) give written approval of an increase in such fixed limit, (2) authorize rebidding of the Project within a reasonable time, (3) if the Project is abandoned, terminate in accordance with Article 5, or (4) cooperate in revising the Project scope and quality as required to reduce the Construction Cost. In the case of (4), the DESIGN PROFESSIONAL, without additional charge, shall modify the Contract Documents, as necessary to comply with the fixed limit. The providing of such service, including rebidding of the Construction Contract, shall be the limit of the DESIGN PROFESSIONAL'S responsibility arising from the establishment of such fixed limit, and having done so, the DESIGN PROFESSIONAL shall be entitled to compensation for all services performed, in accordance with this Agreement, whether or not the Construction Phase commences.
